

# Guide to using eduroam

eduroam is a roaming service that enables the mutual use of campus wireless LANs among educational and research institutions such as universities.

This eduroam is operated on a global scale, and in Japan, the National Institute of Informatics (NII) plays a central role in the operation of eduroam JP.

Saga University has participated in eduroam since April 29, 2017.

Members of Saga University (faculty and students) can use wireless LAN when they visit eduroam participating organizations.

The participating organizations of eduroam can use wireless LAN at Saga University.

## A member (faculty and students) of our university visits an eduroam participating organization.

If you visit universities and research institutes participating in eduroam, please connect to eduroam by following the procedure below.

1. SSID: Connect to a wireless LAN (Wi-Fi) of eduroam or eduroamXXX (where XXX is any character string).
2. You will be prompted for your user ID and password, so enter the following:

User ID: university e-mail address

※ This is the email address assigned by the CNC.

faculty member : User ID@cc.saga-u.ac.jp

students : student number @edu.cc.saga-u.ac.jp

Password : university password

Supplementary notes

1. If you cannot connect with the above information, refer to "User's Guide" in the user information of eduroam JP. <https://www.eduroam.jp/>
2. The members of our university can use eduroam at our university, but they are treated as using the network outside the university.

Generally, you should use the Opengate wireless LAN service on campus.

3. For information on the participating organizations in Japan, see "List of participating organizations" in the information for users of eduroam JP.

## If a member of the eduroam participating organization comes to our university

The eduroam account assigned by the eduroam participating organizations can connect to our eduroam wireless LAN and use the network.

For more information, please refer to your organization's eduroam.

1. SSID: Please connect to eduroam's wireless LAN (Wi-Fi).
2. You will be prompted for your user ID and password, so enter the following:

ユーザ ID: eduroam account in your organization

パスワード: eduroam password in your organization

## If a person who belongs to an organization that does not participate in eduroam comes to our university.

If you come to our university for an event such as a workshop, we may issue a guest account for eduroam at the reception. For details, please contact the reception of the event.
