

Setup procedure of MacOS mail for students

Mac OS (10.15.5 and later) mail supports Microsoft 365 multi-factor authentication and does not require an application password. (You need to set up multi-factor authentication for the Microsoft 365 portal beforehand.)

1. Mac OS mail setting procedure

- ① When you launch the email, click Exchange, then click Continue.

- ② Enter the university's email address 「student number@edu.cc.saga-u.ac.jp」

- ③ Click Sign In.

- ④ Click Work or School Account.

- ⑤ Enter the password.

- ⑥ Performs approval procedures for Microsoft 365 multi-factor authentication.

- ⑦ Click Finish.

That's all for MacOS Mail.
