# Procedure for changing settings to modern authentication for existing Thunderbird accounts

1. Open the Thunderbird Account Settings screen.
   Start Thunderbird.

   Click Tools > Account Settings.

2. Changing the authentication method of the receiving server(outlook.office365.com)

   Change the authentication method in the server settings to "OAuth2"

3. Changing the authentication method for sending server (smtp.office365.com)

   If you are setting up a university sending server ((smtp.cc.saga-u.ac.jp), you do not need to set up modern authentication. Select the sending (SMTP) server, select User ID@cc.saga-u.ac.jp – smtp.office365.com (default), and click Edit.
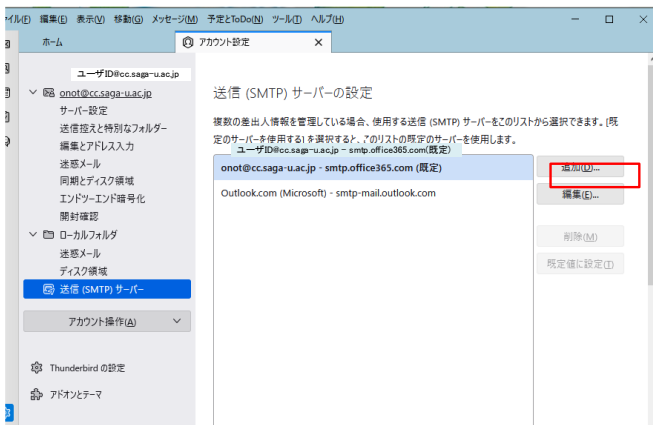

Change the authentication method to OAuth2 and click OK.

Click ［×］ in Account Settings and close the tab.
