How to create a QR code for a website

Edge and Chrome have the ability to create QR codes for your home page.

How to create a QR code in Edge

• Open the home page where you want to create a QR code in Edge, right-click anywhere in the home page, and click Create QR Code for This Page on the menu screen.

• The "Scan QR code" screen will appear in the upper right corner of the screen. Click "Download" to save the QR code.

How to create a QR code in Chrome

• Open the home page where you want to create a QR code in Chrome, right-click anywhere in the home page, and click Create QR Code for This Page on the menu screen.
