How to take a screenshot of the home page screen

Edge and Firefox have the ability to take screenshots of your home page.

To take a screenshot in Edge

• Open the home page where you want to take a screenshot in Edge, right-click anywhere in the home page, and click Web Capture on the menu screen.

• When you see a screen like the one below, drag the area where you want to take a screenshot.

 When you drag the area you want to take a screenshot, the screen looks like this: If you want to paste directly into an open file such as Word, click [Copy]. If you want to save the screenshot image to a file, click [Mark Capture...].

To take a screenshot in Firefox

• In Firefox, open the home page where you want to take a screenshot, right-click anywhere in the home page, and then click Take Screenshot on the menu screen.
