

How to Update Opengate Device Registration

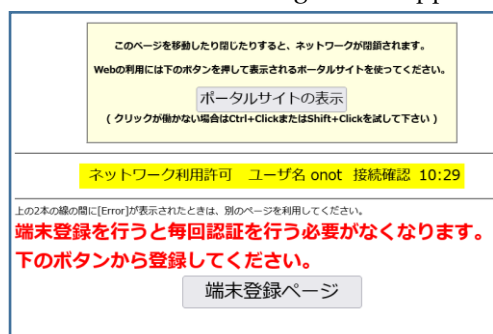

Device registration for Opengate is typically updated via the link provided in the monthly notification email titled "Mac Address Registration", which is sent at the end of each month.

However, if you are unable to come to campus by the end of the month and can no longer access the update link in the email, you can update your registration using the alternative method described below.

- Once you have confirmed that your device is connected to an Opengate wireless access point, access the Saga University official website at <https://www.saga-u.ac.jp>
- When the Single Sign-On authentication screen appears, enter your user ID and password to log in.

- When the following screen appears, click [Device Registration Page].

- When the "MAC Address Registration Update" screen appears (showing the list of devices registered with Opengate), click [Submit].

更新	休止	削除	MACアドレス	機器名	メールアドレス	登録日時	期限日時	状態
