

④ F-Secure Installation Instructions for Mac OS

1. Preparing Before Installing F-Secure

Connect the laptop PC on which F- Secure is to be installed to the campus wireless LAN "000saga-u" to enable Internet access. (⑤Refer to the campus wireless LAN connection and Internet usage procedures)

When installing software for Intel processors on a Mac with an M1 chip, you may be asked to install "Rosetta". so install Rosetta.

Once this "Rosetta" is installed, it will not ask you to install it again.

2. F-Secure Installation Procedure

Installation procedure on the latest version of Mac OS, Monterey.

- ① Access our homepage (<https://www.cc.saga-u.ac.jp>) with a browser (safari).
Click on "Information Security" in the "Student Portal" and click on "Anti-Virus Software (F-Secure) Download Site".

The link button will not be displayed when accessed from off-campus.

- ② When the Single Sign-On Login Authentication screen appears, enter your user ID (student number) and password to log in.
