

Connecting to and Removing the “000saga-u” Campus Wi-Fi on macOS

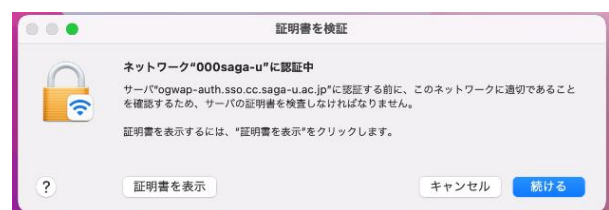

- Connecting to 000saga-u

Click "Other Networks" under "Wi-Fi" and then click "000saga-u".

Enter your account name (student ID number for students) and password, then click [OK].

When the “Verify Certificate” screen appears, click [Continue]

When the "eaptlstrust" screen appears, enter your Mac Login ID and password then click [Update Settings].

Once “000saga-u” displays a blue Wi-Fi icon, the connection has been successfully established.

- Removing the “000saga-u” Wi-Fi Configuration

Click on "Network Preferences" under Wi-Fi.

When the “Network” screen appears, if it’s locked, click “Click the lock to make changes,” enter your Mac login password, and then click [Unlock].

Once you’re able to make changes to the network settings, click [Advanced] next to “Show Wi-Fi status in menu bar.”

In the Wi-Fi tab, select “000saga-u” and click the “–” button to remove the network.

When “000saga-u” disappears from the list of Wi-Fi networks, click [OK].

Return to the Network settings screen and click [Apply].
