

How to Disable a Device Registered in the Microsoft 365 Portal

If you've lost a device or no longer use one that's registered in your Microsoft 365 account, follow these steps to disable it:

- First, open the Microsoft 365 portal and click your profile icon in the top-right corner. Select **View Account** from the menu.

- In the account dashboard, go to **Devices** and click **Manage Devices**.

- Find the device you want to disable and click its name.

- Then click **Disable lost device** to deactivate it.
